

EXAMPLE – PROFILES, OBJECTIVES, SKILLS & ATTRIBUTES

Cyber and Risk

EXAMPLE 1

PROFILE

A passionate Technology leader with extensive experience covering a wide variety of disciplines, including IT security/cyber, technology operations and consulting.

I protect organisations from the risks of modern technologies by creating an environment where technology implementation / use is managed, governed, and then balanced with educated risk management and informed decision making.

Strong ability to drive business objectives whilst managing risks garnered through industries operating within heavy government regulation including Telecommunications, Manufacturing & Logistics, Advertising & Media, Government and Technology Services.

SKILLS & ATTRIBUTES

Cybersecurity & Risk

- Establishment of cybersecurity fundamentals and culture adoption
- Planning, implementation and management of a diverse technology security posture using a mixture of internal cross-functional teams and specialist security suppliers
- Implementation of, and ongoing management of risk with senior stakeholders
- Development of robust incident management and reporting functions
- Managing crisis situations with clear communication, transparency, and informed decision making
- Implementation of Agile processes and SecDevOps to support continuous management of technology
- Facilitation and development of processes, standards and forums to help advise and govern secure IT roadmap design, feasibility assessment, and technology selection

Management, Leadership & Strategy

- Strategic IT-business alignment via shared technology roadmaps and ongoing delivery of business value
- Building and developing strong, high performing team culture across cross-functional delivery teams
- Highly motivating and empowering management style with a focus on trust and self-management

Communication & Interpersonal

- Building and managing stakeholder relationships from front-line staff to C-suite executives
- Ability to report, present, influence, advise and negotiate effectively, including public speaking
- Simplifying complex technology concepts and guide business stakeholders at all levels
- Outstanding business and supplier relationship management

Cyber and Risk

EXAMPLE 2

PROFILE

Cyber Security and Risk Mitigation Specialist with over 7 years' experience working across private and Not-for-profit sectors, managing security risks, analysing threats and identifying vulnerabilities to protect businesses from digital attacks. With a Master of Cyber Security from RMIT University, alongside a commitment to ongoing professional development to stay up to date with the constant growth and change in the field, I can provide peace of mind that an organisation's data will be protected.

CAREER OBJECTIVE

Seeking a challenging position as a Cyber Security Specialist in a company/organisation where I can utilise my extensive knowledge base to make a significant impact in protecting systems, networks and programs from digital attacks.

SKILLS & ATTRIBUTES

- Familiarity with ISO/IEC 27001 and the Essential Eight
- Penetration testing and vulnerability scanning across various technology layers (including cloud environments, wi-fi, internal networks and more), able to work independently with minimal direction
- OSCP Certified
- Detailed understanding of security technologies (Firewalls, IPS/IDS, SIEM)
- Familiarity and working knowledge of network analysis tools such as NMap, Burp suite, and security testing tools such as Nessus, Metasploit, Fortify
- Comprehensive understanding of network and internet technologies and protocols such as TCP/IP, DNS, encryption technologies and standards, VPNs, IPSEC, VLANs, VoIP, HTTP, HTTPS, SMTP, routing protocols, etc
- Programming and scripting skills
- Effectively communicating technical concepts to a non-technical audience and report in business-oriented terms
- Excellent communication and interpersonal style to collaborate effectively with cross-functional teams, able to present to Management and provide strategic advice
- Strong analytical and problem-solving skills with an ability to troubleshoot complex issues
